

Harshal Motikar *Senior Product Designer*

motikarharshal@gmail.com | [linkedin.com/in/harshalmotikar](https://www.linkedin.com/in/harshalmotikar) | Portfolio

Senior Product Designer with 12+ years in B2B SaaS, building complex **0-to-1** enterprise products and AI features for clients across the US, Middle East and Europe. I work from early requirements through design and delivery, and I **ship production frontend in Claude Code**.

Professional Experience

Senior Product Designer, Uniquis Consultech Inc

10/2023 – Present | Mumbai, India

- **Sole designer** across five enterprise product areas covering risk, audit, controls, compliance and business continuity, used by **10+ global clients** including Mubadala, IHC and Majid Al Futtaim.
- Own compliance and business continuity as **product owner and designer**, from requirements through design, validation and delivery.
- Use support tickets, sales feedback and practitioner input to identify recurring workflow problems and validate designs.

Shipped

- **Eliminated recurring support requests** for a core workflow after identifying the problem through support tickets and redesigning it.
- Built the production frontend for a new compliance module in **Claude Code**, now live and used in client demos.
- Designed and shipped a financial consolidation product, simplifying a dependency-heavy multi-entity workflow now live across **10 client organisations**.

Design systems & AI workflows

- Evolved the design system with **semantic tokens and reusable components**, improving consistency across new product work.
- Connected the design system to Claude Code through **Figma MCP**, enabling a junior designer and two product managers to build functional prototypes.
- Designed AI workflows for accounting, ESG and compliance, including source-backed answers, document comparison and **automated record updates**.

Co-Founder (Part-time), FitGully.com

08/2021 – 04/2023 | Mumbai, India

- Started during COVID from helping friends train remotely, grew into a home-gym ecommerce and coaching venture. Ran it part-time alongside full-time roles across product design, brand and growth.

Senior Product Designer & Product Manager, E2 Techspace

02/2021 – 01/2022 | Mumbai, India

- Led design and product management for **6 ERP products** from requirements to launch, rebuilding a legacy FileMaker suite into web-based operational tools.
- Used monthly manager feedback and occasional sessions with site staff to **understand field workflows and shape product decisions** for utility and industrial teams.

- Added passive risk checks on shared site devices, so sensitive project data was not exposed when field staff shared logins.
- Built a **design system and component library** across the suite.

Senior Product Designer, MoveEasy, B2B SaaS

04/2019 – 01/2021 | Mumbai, India

- Designed web-based admin and account-management tools alongside customer-facing **iOS, Android and iPad** experiences.
- Created a **white-labelled design system** aligned to brand guidelines.

Product & UI Design, Earlier Experience

09/2013 – 03/2019 | India

- Worked at BookMyShow, Network18, Flochat, and SocioSquares across messaging, OTT, fitness, and e-commerce products. Delivered UI design, user journeys, and design systems.
